

Fernando Santella

Manager, Quality Standards and Practices

Victoria, BC

I have been with BC Assessment since 2005, and my current position is a Manager in Quality Standards and Practices. I hold a DULE from UBC, a Bachelor in Urban Planning from the University of Quebec in Montreal, and a Construction Diploma from Argentinean College. Before moving to Canada in 2001, I worked as an urban planner for the Municipality of Mar del Plata, Argentina and as a consultant in Buenos Aires, Argentina working on project feasibility studies. For a short time, I was an assistant professor in the Faculty of Architecture, Argentina. I hold an RI designation and I was the Institute Victoria Chapter chair for 4 years. I am interested in promoting professional development within BCA by bringing closer to home the array of resources and educational opportunities the association has to offer, working towards increasing awareness and relevance of the association among all BCA appraisers, and participating in the discussion that will set the strategic direction of the chapter.
